

Grafana Monitor Problems

Problems:

Readiness probe failed: Get grafana unhealthy

Post "http://rancher-monitoring-prometheus.cattle-monitoring-system:9090/api/v1/query_range":
dial tcp 10.43.3.173:9090: connect: connection refused

Solutions:

Vấn đề là ta đang xài local dev và sẽ không có https support, vì thế khi install grafana monitoring cần phải set lại https to false:

- + https:
- + enabled: false
- + insecureSkipVerify: false
- + useServiceAccountCredentials: false

Better Solution:

- Delete Grafana since it's too heavy
